

Question

How can I specify the GitHub account I would like to link to in Docker Hub?

Answer

Documentation for linking to GitHub in Docker Hub can be found here: <https://docs.docker.com/docker-hub/builds/link-source/> (<https://docs.docker.com/docker-hub/builds/link-source/>)

Note: If you're wanting to unlink your current GitHub account and relink to a new GitHub account, make sure to completely logout of GitHub (<https://github.com/> (<https://github.com/>)) before linking via Docker Hub.
