If you would like to change your email address, follow the steps below.

1. Log in to Docker Hub (https://hub.docker.com/) on the browser.
2. Click on your account name at the far right of the header.
3. Click on the **Account Settings** tab after getting to the dropdown.
4. In the **General** section which is the first section that shows up, you may change the primary email address or add additional ones.

If you have used the incorrect email during registration please visit the [What if I used the wrong email address during registration?](https://success.docker.com/Support/What_if_I_used_the_wrong_email_address_during_registration%3F) article.
